**DETAILED ACTION** 

Page 2

Claims 1-22 are pending in the instant application.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Claims 1-17 and 19-22, drawn to a method of producing dopaminergic neuronal cells, a

dopaminergic neuronal cell, a method of improving the survival of human neuronal cells for

transplantation, a pharmaceutical composition, a method of preparing human neuronal cells

suitable for treating Parkinson's Disease, classified in class 435, subclass 368.

II. Claim 18, drawn to a chimeric non-human mammal, classified in class 800, subclass 8.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are patentably distinct, one from the other because the inventions are drawn to

distinct methods and compositions. The chimeric mammal of the invention of Group II is not required to

practice the method of the invention of Group I. Although the cell compositions of the invention of Group I

can be used to produce the chimeric mammal of the invention of Group II, the cells can be used in other

methods, such as in in vitro assays to determine the effect of various compounds on the growth and survival

of the cells of the invention. Thus, the methods of the inventions of Groups I and II are patentably distinct,

each from the other.

Because these inventions are distinct for the reasons given above and have acquired a separate status

in the art as shown by their different classification and recognized divergent subject matter and because the

Application/Control Number: 09/494,088 Page 3

Art Unit: 1632

searches required for the separate inventions are not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anne-Marie Baker whose telephone number is (703) 306-9155. The examiner can normally be reached Monday through Thursday and alternate Fridays from 9:30 AM to 7:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Karen Hauda, can be reached on (703) 305-6608. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-8724.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the patent analyst, Kay Pinkney, whose telephone number is (703) 305-3553.
